

## The secret to Pete's success? Workplace Education.

As a small business owner, you face many challenges. How do you attract the best people – and keep them once you've got them? How do you prepare your staff to accept more responsibility, or to use new technologies and processes?

Most importantly, how do you afford training for your employees?

Pete Lockett found all the answers in Workplace Education – a Department of Education program delivered in partnership with business, industry and labour.

### What does Pete say now?

*"We noticed a difference in our employees right away. Your staff is your lifeline to success. Invest in them – it'll pay you back. It did me."*
